

## Smithfield News

SMITHFIELD, April 11.—Funeral services were held on Monday over the remains of Mrs. C. J. Nordberg at the family home. Bishop Lorenzo Toolson had charge of the services. The Second ward choir furnished the music. The choir sang "Though Deepening Trials." Prayer was offered by Sylvester Low. The song "Somewhere the Sun is Shining" was rendered by the choir. Bishop William Winn, Thomas H. Chambers and Bishop Plowman spoke of the splendid life, so agreeable in manner, sympathetic and loving to all friends. Bishop Toolson thanked all who had taken any part in lessening the trials of the family during the death of the wife and mother. Mr. F. T. Allen rendered "Sometime We'll Understand," in a most touching manner. Elder George Done offered the benediction. The grave was dedicated by Elder Hanson. Emma Anderson Nordberg succumbed to influenza pneumonia, leaving a husband and nine children besides a large family of relatives and many friends to mourn her death.

The deceased was the daughter of James and Agnes Olsen Anderson, and was born at Brigham City, December 5, 1874. Her parents soon moved to Salt Lake City where she grew to womanhood. She met and married Ola J. Nordberg in Salt Lake City, but soon moved to Tusco where they resided until five years ago, when they came to Smithfield. Their two oldest sons, Eszen and Raymond were among our brave sons to enlist in the Marine corps and both recently received honorable discharges. The oldest son returned just in time for the services. One son, Harry, who was in the east could not be reached in time for the services. All the other members of the family were in attendance. Mrs. Nordberg since coming here five years ago has added greatly to her host of friends. She was a noble character and truly a long suffering and patient woman. She was a kind

and loving mother, a gentle and affectionate wife. Our sympathy goes out to the family and especially the husband who is a good man and father, and who keenly senses the great loss that has come to him. We mourn with and express our sorrow over the loss they have endured. Among the out of town relatives to attend the funeral services were Mrs. Elma J. Merrill and family of Richmond, Mrs. Jens Anderson of Salt Lake City, Mr. Carl Nordberg and family of West Jordan.

Mrs. George Y. Smith entertained about sixty relatives and friends at her home on Tuesday evening in honor of her husband's birthday. The rooms were decorated with cut flowers and ferns. Delicate refreshments were served and a happy time indulged in.

Mr. and Mrs. E. R. Tuttle of Richmond were the guests of Mr. and Mrs. Frank Winn on Monday evening.

Mrs. Jennie Olney and Mrs. Annie Nordblade of Logan spent Thursday in our city.

Mr. Moroni Price has returned from a visit to McCammon.

Elder Samuel P. Nielsen writes from Sweden that he expects to sail for home this month.

Mrs. Elizabeth Emery of Idaho Falls is the proud mother of a baby girl.

Sunday schools and meetings will be held on Sunday in the respective wards. The flu epidemic seems to have reached the climax and is gradually dying down leaving fewer cases now than at any time during the past three weeks.

The Hyde Park band will give a dance in the Union hall on April 19 the first dance for many weeks.

The following births are reported this week: Mr. and Mrs. Joseph Olney a girl; Mr. and Mrs. Austin Smith a girl; Mr. and Mrs. Golden Reeder, a girl.

Mrs. Munk of Montpelier is visiting her children, Mr. and Mrs. Charles Collett and family.

Mr. William Napper is arranging

to put in a stock of drugs at the Crystal Confectionary. The public will appreciate and welcome competition in this line.

Mrs. John Mather has been visiting her sisters at Salt Lake City the past week.

## COUNTY PEACE LEAGUE MEETS

A meeting of the general committee of the Cache County branch of the League to Enforce Peace was held Wednesday evening at the Commercial club. The following members were present: Representative Cardon, Senator J. W. Funk, J. E. Shepard, Representative W. R. Ballard, George Y. Smith, Mrs. E. R. Owen, and Henry Peterson.

Mr. Cardon, chairman, stated that the object of the meeting was to organize the general committee of the Cache County branch of the League to Enforce Peace. A circular from the State League was read suggesting that counties should pattern after the state organization.

Following this suggestion the following officers and committees were appointed: Jos. E. Cardon, county chairman; Henry Peterson, secretary; George Y. Smith, treasurer; George D. Canto, director of speakers; H. E. Crockett, director of publicity; Jos. E. Cardon, J. E. Shepard, Mrs. E. R. Owen, Senator J. W. Funk and Representative W. R. Ballard, executive committee.

The following resolution sent here from state headquarters, was adopted:

"Whereas, The war now brought to a close by the associated and victorious armies of the allied nations of the world, was a war to end war and to protect human rights.

"Be it resolved by the Utah branch League to Enforce Peace, that we declare ourselves for the establishment of a League of Nations to Enforce Peace, which League should aim to establish peace based on liberty, justice and orderly, progressive development of the world; and

"Be it further resolved that we believe that now is the time to formulate public opinion and sound views in behalf of such a League of Nations so that the ideals of the American nation may be embodied in the constitution which is being drafted at Paris by the representatives of the allied nations of the world."

Following is the membership of the Cache county committee:

Joseph E. Cardon, Chairman; O. H. Budge, Logan; H. E. Crockett, Logan; George D. Canto, Logan; Mrs. E. G. Peterson, Logan; J. E. Shepard, Logan; George Y. Smith, Smithfield; J. W. Funk, Richmond; J. J. Facer, Hyrum; Ephraim Bergeson, Cornish; Mrs. E. R. Owen, Logan; Mrs. Thos. B. Farr, Smithfield; Wm. H. Griffin, Cache Junction; Henry Peterson, Logan; S. B. Mitton, Logan; Goudy Hogan, Lewiston; Samuel P. Oldham, Paradise; W. R. Ballard, Newton.

## A DESTRUCTIVE FORCE

The influence of the league of nations as a destructive rather than a productive agency is forcefully presented by former Senator Root. The new league, according to him, not only abrogates all of the 260 treaties of arbitration existing among the nations of the world, but "it puts the whole subject of arbitration back where it was 25 years ago. Instead of perfecting and putting teeth into the system of arbitration provided for by The Hague conventions, it throws those conventions upon the scrap heap."

"All questions of rights," continues Mr. Root, "are relegated to the investigation and recommendation of a political body to be determined as matters of expediency. I confess I can not see the judgment of three gen-

erations of the wishes of wisest and best of American statesmen, concurring in by the wisest and the best of all our allies, thus held for naught.

But it is to the preservation of the Monroe doctrine that Mr. Root directs particular attention. He asserts that to surrender that time honored policy at this time would be purely gratuitous and would not contribute in the slightest degree to the accomplishment of the objects of the league. "The difficulties, the disturbing conditions, the dangers that threaten are all in the affairs of Europe and the Near East. The real reason for creating a league of nations is to deal with those difficulties and dangers, not with American affairs. \* \* \* It hardly seems probable that under these circumstances the United States should be penalized for complying with the request of its friends in Europe to join them in the preservation of peace primarily for their benefit, and not for ours, by giving up our right to self protection, when that is wholly unnecessary to accomplish the object of the agreement."

In other words, as has been pointed out by most of the speakers against the league, the United States is asked to give up the instrument that has protected us for nearly one hundred years, and to accept in its place an experimental league which admittedly will permit of the very things that the Monroe doctrine guards against. There is no "balance of power" on this side of the water. The disturbing conditions, as Mr. Root points out, are all centered in the old world, and it is to prevent their recurrence that the league is to be formed. If the United States is to contribute to that end there is absolutely no reason why the peace of the new world should be jeopardized by destroying the very policy that has insured it.

In closing his arguments, Mr. Root emphasizes the impossibility of framing a permanent league in the warlike atmosphere that now prevails throughout Europe. He lays stress on the fact that under present circumstances it would be most unwise to attempt to give finality to such an agreement, and to make its terms irrevocable. Yet that has been precisely Mr. Wilson's policy. In the constitution of the league as read by him there is no provision for a nation's terminating its membership, there is no method provided for future amendment in case any of its provisions are found unworkable, and its obligations, once assumed, constitute a permanent obligation.

### Homemade Floor Polisher.

When polishing floors make a thick pad of felt or velvet and fasten it over an old worn-out broom. This makes an excellent polisher and saves the trouble of kneeling on the floor.

## Cord Tires Coming To The Front

An observing person will notice on the various automobiles on the street a high percentage of tires of cord construction. This percentage, growing each year in original equipment, is analyzed by W. T. Powell, acting district manager of the B. F. Goodrich Rubber Company's San Francisco branch.

"Almost from the beginning of pneumatic tire manufacture designers have been striving toward a construction which would at one time deliver the maximum amount of the engine's power, be resilient to the highest degree, and be long lived," said Powell. "This is a natural ideal toward which the tire designer should strive, because of the tire itself being so essential an item to the all around efficiency of the car—not only adding comfort, but minimizing vibration which would have to be carried by the springs, and which, in the absence of pneumatic tires,

would be carried through to the mechanism of the car, so the car could not hold together nearly so long.

"Comfort, minimizing of vibration and delivery of an added amount of power from a given engine, could be accomplished only by the use of a tire constructed as is the present day cord. Automobile engineers have found that 80 per cent of the power generated by the motor is lost before it is delivered in the form of speed. Much of this power loss is through the tires themselves. Cord tires reduce this loss to a minimum. Cars equipped with cord tires have negotiated steep hills in high that fall on the same hill with fabric equipment. This has been proven scores of times and is a practical demonstration of the additional power cord tires give a car.

"There is no question that the cord constructed tire is most efficient. It may be said to add tone to the car, and the car rides easier; it will coast farther; it will consume less gasoline; it will steer easier, and can 'pick up' quicker.

"As constructed during the last few years, it actually has demonstrated marvelous strength. When automobile racing was at its height it was found that only the cord tire could deliver the speed and stand up under the severe treatment that the racing driver must give any true equipment he is using.

"On account of the greater cost it necessarily has sold at a price in excess of that charged for straight fabric construction. This naturally has caused it to be used almost exclusively on the large, more expensive automobiles.

"While the cord tire is still a distinctive tire, used largely by the man who wants something a little better, there recently has been a noticeable trend on the part of Mr. Average Car Owner to take note of this particular equipment, and buy for himself the added merit which goes with the cord tire, and which these days may be

bought without extreme difference in cost that was necessarily present a few years ago. In other words, the average car owner is now able to profit by the increasing popularity of the cord tire, which through increased production, has been brought down somewhat in cost."

Very few people realize that athletics among industrial concerns has taken on proportions that actually rival, in numbers engaged and equipment employed, the efforts of the largest American universities and colleges. The B. F. Goodrich company of Akron, Ohio, one of the foremost advocates of recreation and social life among the large industrial concerns of America, is entering its most extensive year in athletics. Twenty-one fully uniformed and equipped baseball teams will take the field early in May. The company maintains a recreational director who has under him coaches in baseball, track, tennis, soccer and other sports, an athletic stadium with equipment for practically every sport; a 40 acre tract of land which includes a lake; a gymnasium located in the heart of the plant; and supervised employees who lead calisthenic class during working hours. Thirty thousand people have turned out at one time to see an inter factory athletic meet in Akron.

## GIVE "SYRUP OF FIGS" TO CONSTIPATED CHILD

Delicious "Fruit Laxative" can't harm tender little Stomach, Liver and Bowels.

Look at the tongue, mother! If coated, your little one's stomach, liver and bowels need cleansing at once. When peevish, cross, listless, doesn't sleep, eat or act naturally, or is feverish, stomach sour, breath bad; has sore throat, diarrhea, full of cold, give a teaspoonful of "California Syrup of Figs," and in a few hours all the foul, constipated waste, undigested food and sour bile gently moves out of its little bowels without griping, and you have a well, playful child again. Ask your druggist for a bottle of "California Syrup of Figs," which contains full directions for babies, children of all ages and for grown-ups.

## The Milton Player Piano Is A Man's Instrument

The ease with which a Milton player piano can be played, effectively, appeals very strongly to men.

We find that men like a playerpiano at which they can seat themselves and get good results instantly. And such an instrument is the Milton.

There are no complicated devices that require study or that have to be "learned" Simply sit down and play.

We are willing to guarantee to any man, that the very first evening he has a Milton player in his home, he will be playing his favorite airs and songs, better than they are usually played by the average pianist after ten years practice.

The Milton playerpiano may now be purchased for \$585 upon your own terms, within reason of course.
